Fax: +91 512 259 6177

Applications are invited for internship from meritorious undergraduate & post graduate engineering students with very good aptitude for research and development in electronic system design and are willing to gain practical experience. You should be willing to work under tight schedules without compromising the quality. Semester or yearlong internships are preferred.

Send your CV to interns@gt-silicon.com with RI in subject line.

About GT Silicon

We are a niche electronic systems design & development company. We design and develop systems around MEMS and other Micro & Nano based technologies and carry out joint research & development with the researchers. Researchers with no or minimum access to development resources and skill set, collaborate with us right from the very initial stages of research so that expertise in industrial research & development and understanding of market dynamics can be used to give usable and sale-able shape to the to the planned research and deliver exploitable results. We are incubated in SIDBI Innovation & Innovation Centre, IIT Kanpur. To know more about us, please visit our webpage.
